

## IVM 18-798 Project Requirements V1.0

Total: 40%  
Demo 30%  
Final Report 10%

### Due Dates:

Demo due on December 2, Tuesday

Final Report Due on December 9, Tuesday

### Requirements for demo

- The code runs!
- The code is not your laptop-specific. It can run on another computer.
- During the live demo, clearly explain what's your method and what the system is designed to do.
- Prepare a one minute video as a "video poster" to be projected in classroom while you are doing the demo.
- Tangible output from your demo.
- One than one single input samples (have to make a statistical sense).

### Requirement for the final report

- Your name!
- Problem Statement and Background
- Algorithm Survey
- Algorithm or System Description
- Prototype Description
- Experiment Report
- Mathematical Articulations (if any)
- Algorithmic comparisons
- References
- You must clearly cite any open source code you have used in the demo.
- Burn a CD with the source code, input and output sample data, demo video and final report. Write the project title and NAME on the CD!
- Turn the borrowed equipment.
